

LINDR GRAND T5 TOWER

The LINDR GRAND dispense tower with five taps will become the dominant feature of every bar.

We used the design of the LINDR T series, but structurally modified it to make its assembly as easy as possible.

| BENEFITS AND USEFUL FEATURES

DOMINANT LOOK - LINDR GRAND is a dispense tower that no one will overlook, with its impressive construction it immediately attracts attention.

RECIRCULATION - Recirculation right up to the taps is done thanks to the unique construction of the tower with a well-insulated cooling coil for each tap separately. For these purposes, a special recirculation connection set is supplied with the stand.

BEVERAGE COILS - Choice of 8 and 10 mm diameters as required.

EASY COMPLETATION - The tower can be assembled on site.

QUALITY DESIGN - The tower is composed of the highest quality materials - from stainless steel through hardened, polished plastic to oak wood.

UNIQUE INSTALLATION SYSTEM - Special installation with a simple, "click-clack," system, where the whole tower can be assembled by simply clicking and fixing the middle cock.

ECONOMICAL PACKAGING - We deliver the tower folded and packaged so that we handle packaging material and transport costs gently.
